

Select Insulin Savings Program

Senior Care Plus is offering affordable, fixed insulin costs through the Part D Senior Savings Model

What the Select Insulin Savings Program is:

The Part D Senior Savings Model—that Senior Care Plus calls the Select Insulin Savings Program—helps address the needs of our diabetic Medicare members who use insulin. The program is available with most of the Medicare Advantage plans offered by Senior Care Plus.

How the Select Insulin Savings Program works:

Eligible members* pay fixed copays of \$35 or less at all in-network pharmacies for a 30-day supply of covered [Select Insulins](#), through the coverage gap (also called the “donut hole”). The average projected annual savings can add up to a savings of \$446 (66%) per year on Select Insulin costs.

While the maximum copay for each Select Insulin is \$35 (for up to a 30-day supply from an in-network pharmacy), some plans feature copays as low as \$0 for up to a 30-day supply. See your plan’s Summary of Benefits and Evidence of Coverage for details of the specific copays.

To learn more about the Part D Senior Savings Model—that Senior Care Plus calls the Select Insulin Savings Program — [view this brief video from the Centers for Medicare and Medicaid Services \(CMS\)](#).

*Not all Senior Care Plus plans are participating in the Select Insulin Savings Program. Members who receive prescription drug assistance through Medicare’s Extra Help program, members in the D-SNP (Extensive Duals) plan, or members in a Group Medicare plan are not eligible. Part B insulin (pumps) are not included in this Part D benefit.
